HIGHLIGHT OF QUALIFICATIONS

- Bachelor's degree candidate in Computer Science with an Associate's in Computer Programming, maintaining a 3.0+ GPA across both programs
- Proficient in multiple programming languages including Python, Java, C++, and JavaScript, with hands-on experience in full-stack web development using React, Node.js, and Azure
- Proven ability to collaborate in Agile/Scrum teams, having served as both Product Owner and Scrum Master while delivering real-world SaaS applications deployed to the cloud
- Experienced with cloud platforms (Azure, Firebase), databases (MySQL, MongoDB, Firestore), data science tools (Pandas, NumPy, Matplotlib), and emerging AI technologies including Claude Code and AI agents

SUMMARY OF TECHNICAL QUALIFICATIONS

OPERATING SYSTEMS:

- Windows, Linux, VMWare, VirtualBox

PROGRAMMING LANGUAGES:

- Python, Java, C++, C, OOP

WEB DEVELOPMENT:

- HTML, HTML5, CSS, JavaScript, Python-Flask, Node.js, React, Vite, REST Api

DATA SCIENCE AND STORAGE:

- Pandas, SciPy, Matplotlib, NumPy, JSON, XML, NoSQL, MySQL, Oracle, MongoDB, Firestore

DEVELOPMENT MANAGEMENT TOOLS:

- Git, GitHub, GitHub Workflows, Azure, Express, Firebase, Local Testing

METHODOLOGIES:

- Agile, Scrum, Product Owner, Scrum Master

HARDWARE/SYSTEMS:

- PC, Cloud, Virtualization, Backups, VPN

EMERGING TECHNOLOGIES:

- Claude Code, AI workflows, AI agents, Azure AI Foundry, Copilot AI

EDUCATION

Bachelor of Science in Computer Science
Lewis University, Romeoville, IL

Expected: August 2026
GPA: 3.0/4.0

Associate in applied science in Computer Programming
Joliet Junior College, Joliet, IL

Graduated: August 2024
GPA: 3.1/4.0

PROJECTS

Stories: Team Project at Lewis University

- Developed a SaaS web application as a scrum team that allows users to create a product, product backlog, and sprint backlog to plan team progress on a product. Users are able to create an account and be authenticated. They are able to create user stories inside a product that has fields ID, user story, priority, estimate, spike, status, and assignment. Users are able to add, edit, delete, sort, or move Stories. Users are also able to share projects between users, export backlog pdfs, make changes to their account, and finish sprints to clear user stories. Used: Html, CSS, JavaScript, Firebase, Express, Firestore, Git, GitHub, Authentication, App Hosting, Express, Node.js
 - GitHub Repo: <https://github.com/NothingRK05/Stories-Product-Backlog>
 - Project URL: <https://back--stories-dec4a.us-east4.hosted.app/>

FirebaseTest: Personal Project

- Developed a SaaS web application where users can plan trips or vacations they want to go on. They can add essentials to the trip like flights, car rentals or hotel. They can also add activities onto their trip planner like restaurants, amusement parks or entertainment. I am using this website mainly to learn React, to test AI, and to test firebase functionality compared to Azure since everything is packaged together. Used: React, CSS, JavaScript, Vite, Git, GitHub, Authentication, Hosting, Firestore, Claude AI agent, Copilot AI
 - GitHub Repo: <https://github.com/NothingRK05/firebaseTest>
 - Project URL: <https://fir-test-da4fb.firebaseio.com/>

Health Insurance Risk Calculator: Team Project at Lewis University

- Developed a web application as a scrum team that calculates how much risk a person is based on their age, weight, height, blood pressure, and family diseases. This application leverages the use of client/server REST Api endpoints to

calculate certain fields, like BMI, blood-pressure category, risk calculation, and ping. Used: Html, CSS, JavaScript, Express, Azure, Git, GitHub, Node.js

- GitHub Repo: <https://github.com/NothingRK05/Health-Insurance-Risk-Calc-Client>
- Project URL: <https://ashy-tree-0d5643810.6.azurestaticapps.net/>

Inventory System: Project at Joliet Junior College

- Developed a multifunction inventory system that could add, delete, update, search and display items. Used different data structures like a BST or linked lists to have efficient searching, insertion and deletion of data. Used: Java

Virtual Machine Hardening: Project at Lewis University

- Used a VM to simulate making a Linux system secure and reducing the attack surface. Used different techniques like removing any unnecessary services, closing unused ports, configuring Linux's build in firewall, and strengthening password policies. Used: Linux, Wireshark, Nmap, PuTTY, Virtual Machines

EXPERIENCE

Stocker

February 2023 – Present

Menards, Crest Hill, IL

- Freight Processing: Unpack and break down incoming delivery trucks in the receiving area.
- Stocking & Upstocking: Restock shelves, build promotional displays, and move excess inventory to upstock locations.
- Inventory Control: Rotate products, ensure shelves are properly labeled, and maintain accurate inventory counts.
- Customer Assistance: Greet customers, assist them with locating products, and help with order pickups if needed.
- Aisle Maintenance: Keep shelves organized, clean up packaging debris, and maintain safe, accessible aisles.

Cook & Server

August 2019 – January 2023

Senior Star at Weber Place, Romeoville, IL

- Prepared menu items by following standardized recipes and presentation guidelines.
- Cooked meals to meet resident preferences and special requests.
- Monitored food safety standards to uphold health regulations.
- Demonstrated strong multitasking skills, managing multiple orders simultaneously without sacrificing quality or presentation.
